WITH ZEROWATT

**REDUCE
COSTS***

UP TO 30%

**STAY ONE
STEP AHEAD**

WITH PREDICTIVE
MAINTENANCE

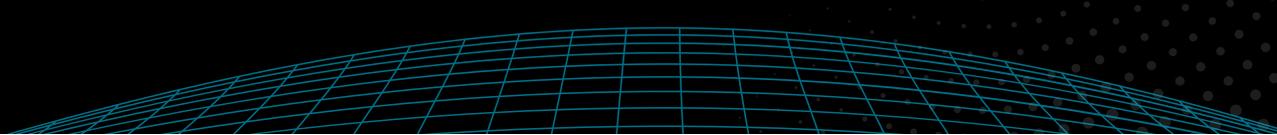

**MAKE A
DIFFERENCE**

BY REDUCING YOUR
CARBON FOOTPRINT

WELCOME TO A NEW ERA

of energy efficiency with the Zerowatt Energy Intelligence System. Designed with commercial facilities and industries in mind, Zerowatt's cutting-edge AI-driven solution helps significantly reduce electricity costs, prevent costly equipment breakdown, and make a positive impact on the environment.

COSTLY POWER

Electricity costs significantly impact operating expenses. Typically, in most commercial establishments and industries, about 30% of electricity is wasted, thereby creating a needless financial strain.

HIDDEN BREAKDOWNS

Undetected minor issues may turn into severe equipment breakdowns. Such unexpected failures result in substantial downtime and revenue loss.

OPERATIONAL INEFFICIENCY

High energy usage often arises from flawed equipment or ineffective usage habits. These factors result in unnecessary energy wastage and unneeded expenses.

MAINTENANCE BLINDSPOT

Without the means to gauge the impact of maintenance activities on energy consumption, businesses find it challenging to optimize operations and improve efficiency.

CARBON FOOTPRINT

As environmental responsibility becomes increasingly important day by day, the escalating carbon footprint from operations poses a significant threat to a business's reputation and customer loyalty.

POWER OPTIMIZER

ZeroWatt Energy Intelligence System identifies wasteful patterns, enabling businesses to cut back on electricity usage and reduce operating costs significantly.

PREEMPTIVE MAINTENANCE

ZeroWatt detects all minor equipment issues before they escalate into major problems. This helps prevent downtime and avoid potential revenue loss.

EFFICIENCY ENHANCER

ZeroWatt identifies faulty equipment and inefficient usage patterns, allowing businesses to address these issues, thereby further optimizing their energy consumption.

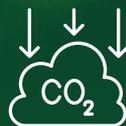

MAINTENANCE NAVIGATOR

ZeroWatt offers insights into how maintenance activities impact energy consumption, equipping businesses with the necessary knowledge to optimize these efforts and improve overall efficiency.

CARBON MINIMIZER

By optimizing energy consumption, ZeroWatt helps businesses reduce their carbon footprint which in turn contributes to a healthier environment and enhances the business's green reputation.

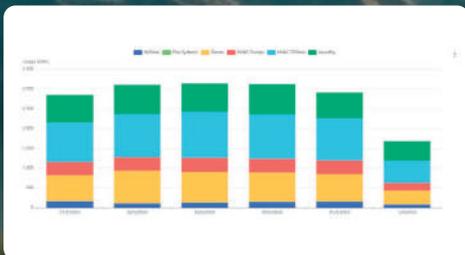

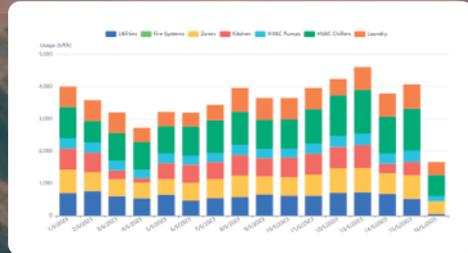

HISTORICAL AND LIVE ENERGY MONITORING

Access real-time and historical data on electricity consumption within any area of your facility.

AUTOMATIC ABNORMALITY DETECTION

With our advanced algorithms, detect unusual energy usage and receive immediate alerts.

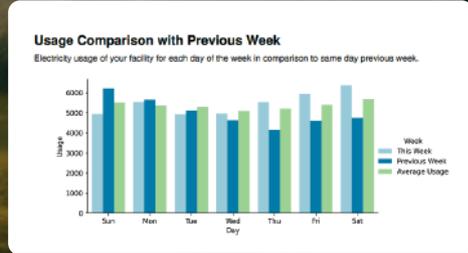

CONFIGURABLE ALERTS SYSTEM

Set up custom alerts on mobile and web platforms based on your unique criteria, ensuring total control over your facility.

INFORMATIVE MANAGEMENT REPORTS

Stay updated with daily and weekly overviews of your facility's status delivered directly via WhatsApp or email.

MULTIFACETED ENERGY MANAGEMENT

Explore Zerowatt's extensive set of features beyond just monitoring and alerts. From predictive maintenance and equipment benchmarking to corporate dashboards, Zerowatt provides a comprehensive, well-rounded energy management solution.

Lead the way to a greener future...
with Zerowatt Plus

Identifying and cutting down on unnecessary energy consumption reduces your industry's carbon footprint and contributes to a more sustainable future

ZEROWATT IMPACT

Energy intelligence success stories with Zerowatt

With the help of ZeroWatt Energy Intelligence System, a large factory was able to identify that standby equipments were responsible for 30% of their energy consumption. By slight modification in SOP, they were able to reduce costs significantly.

With the help of ZeroWatt Energy Intelligence System, a 5-star hotel was able to detect several malfunctions in their facility, including heat pumps not cutting off due to controller issues and equipment running unnecessarily during peak electricity tariff times. By resolving these issues, they were able to reduce their monthly electricity cost by 25%.

ZeroWatt Energy Intelligence System helped an industry to identify that their standard operating procedures for starting equipment were not being followed, which could have resulted in the reduced lifespan of the equipment and potential breakdowns. By taking corrective measures, they were able to ensure the efficient operation of their equipment, reduce energy waste, and save costs.

AND MANY MORE EXAMPLES...

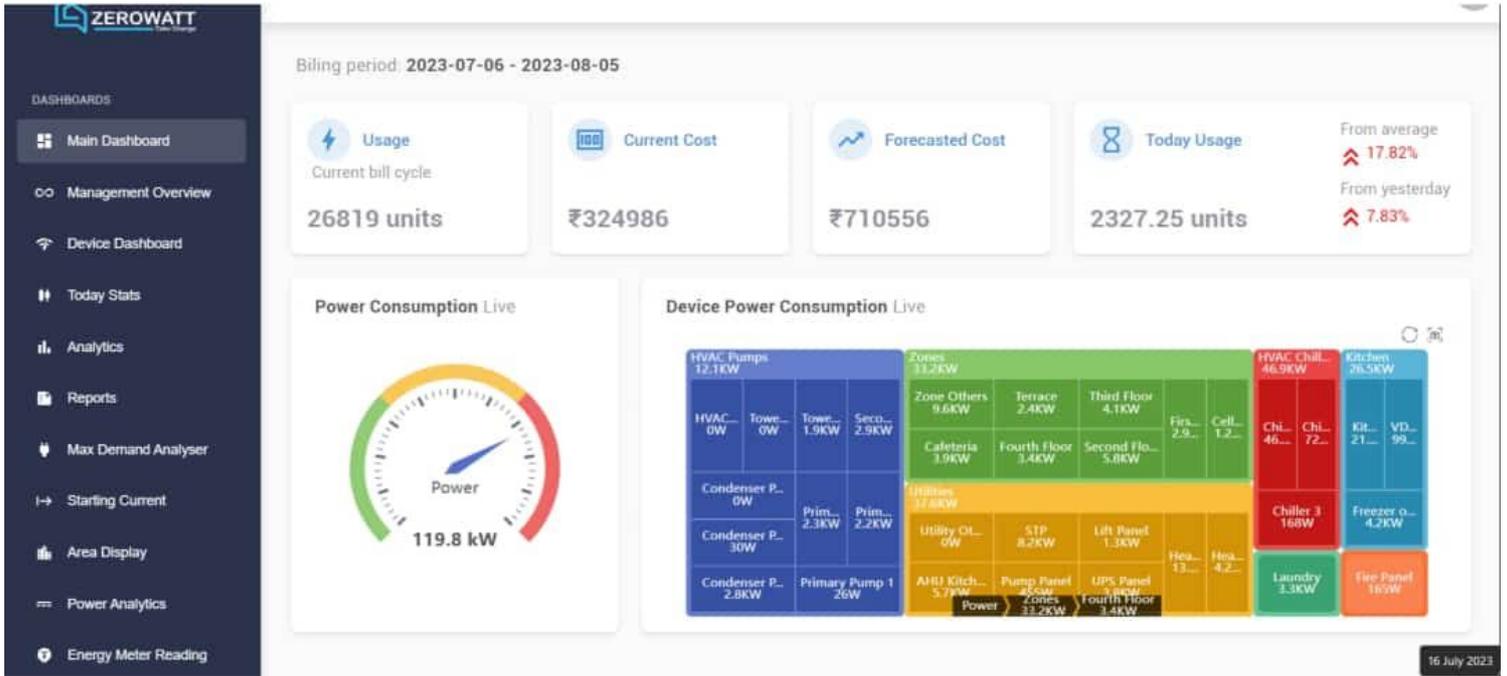

Choose ZeroWatt Energy Intelligence System to unlock valuable insights, achieve cost savings, optimize operations, and reduce your facility's carbon footprint.

Ready to revolutionize your energy management? Contact us today to schedule a consultation and discover how the Zerowatt Energy Intelligence System can transform your business.
